

THE QO₂TM PROFILE

The Opportunities/Obstacles Quotient (QO₂TM) Profile is a unique tool that determines the balance of effort people put into seeing the opportunities or obstacles at work and how they are likely to approach risk.

At work, it is important to have 'balance' - people who focus on the opportunities without seeing potential obstacles can make hasty decisions, whereas those who focus too much on the obstacles may never give the go-ahead to new projects or ventures.

The Profile provides personalised feedback on how an individual will see and respond to new situations and changes, solve problems, whether they sustain their focus on goals, how they handle risk and whether they take a broad view that encompasses past, present and future.

“The QO₂TM is a powerful tool in helping team members understand others approach to risk taking and openness to new ideas. When selecting climbing partners, QO₂TM really comes to the fore especially when one climber has a 1.5 and his climbing buddy is a 5.4 as actually happened on the summit bid for Everest.”

Bob Killip & Zac Zaharias,
Everest Expedition 2001

The Risk-Orientation model is the basis of the QO₂TM concept and defines five subscales that are used to calculate the QO₂TM.

- MTG Energy - how much energy you put into 'Moving Towards Your Goals'
- Multi-Pathways - the extent to which you find ways around obstacles
- Fault-Finding - how good you are at seeing potential obstacles
- Optimism - the extent to which you expect positive outcomes
- Time-Focus - a measure of your psychological time and your orientation to the past, the present or the future
