

LLP|360 Linking Leader Profile

The Research into teams and leaders throughout the world identified 13 universal Linking Skills essential to effectively integrate the work of individuals, teams and organisations. From this global research, Drs. Margerison and McCann developed the Linking Leader Model.

Linking, the integration of people and work, is necessary to ensure sustainable high performance. The Linking Leader Model describes three levels of Linking: People Linking, Task Linking and Leadership Linking – all required for successful leadership and teamwork.

The Linking Leader Profile is a 360° Profile, which allow individuals to pinpoint the extent to which they should, and do, demonstrate 13 key work competencies. The LLP|360 provides a great foundation for discussions focused on effective leadership, and is often used to benchmark and monitor performance improvement over time. The LLP|360 gives you the objective data required to develop and sustain high performance in your organisation. The Linking Leader Model is universal, allowing the Profile to be applied across all areas of the organisation, regardless of industry.

Margerison-McCann
Linking Leader Model

LLP|360 Benefits

- Provides objective, meaningful 360° feedback on how to improve leadership performance at work
- Identifies 13 critical competencies all leaders require to be effective, on which you can tailor training and development plans
- Allows you to capture data on performance improvement over time
- Highlights areas for improvement in concrete, behavioural terms
